

We have collaborated with Cloud Accounting Support Services Ltd for the last 4 years and are absolutely delighted with them being a member of our team for the benefit of our clients.

This means:

1. New clients automatically get referred for Xero software training and if needed ongoing support via monthly retainer fees so they can become compliant as quickly as possible.
2. We can focus on advice on tax deductible business expenditure and general advice on assisting the business to grow and understand the numbers required to achieve their goals. This adds value to clients that couldn't otherwise afford the services of a part time Finance Director.
3. We also have reliable income and expenditure figures to be able to do pre year end business and tax planning so the business can make decisions on investment in assets/pensions before the year end to reduce their corporation tax bill.
4. In the pre year end meeting have time to decide on whether it is appropriate to advance expenditure before the year end or defer sales to reduce the corporation tax bill and to be able to quantify the saving by taking action.
5. The clients then have time to set aside in a separate bank account the corporation tax due in over 9 months time so there are no nasty surprise tax bills payable. Cash is king and never more so than now.
6. As clients grow and they need inhouse book-keeping they can rely on Cloud Accounting Support Services Ltd to provide an efficient service remotely to their satisfaction.
7. Most importantly we recognise each others specialisms and by collaborating in this way the client gets the best service possible both to ensure they have adequate accounting records at any time and providing us with reliable figures as a platform for our business and tax advice to make a difference to the clients business.

This provides the client with value for money.
